Letter of commitment to the priorities of the Concordat for the Environmental Sustainability of Research and Innovation Practice

I, Professor Charles Egbu on behalf of Leeds Trinity University, confirm our commitment to the priority areas outlined in the Concordat for the Environmental Sustainability of Research and Innovation Practice.

Leeds Trinity University fully supports the priority areas outlined in the concordat. We will deliver against all the priorities in practice and recognise our responsibilities as a signatory, as set out in the concordat.

By signing this concordat we recognise the need to change how we conduct research and innovation as well as promote wider solutions. We also agree to take shared action now and into the future to reduce and eliminate our own environmental impacts and emissions and achieve the transition to sustainable practices.

Our commitment to this Concordat will further support our drive to embed sustainable practices and value creation into our University system, which we are delivering through our Strategic Plan and Sustainability Framework. Our commitment will help create meaningful change to collectively reduce the environmental impacts of carrying out research and innovation and we will work collaboratively with the sector towards this shared ambition.

Yours sincerely,

Professor Charles Egbu PhD, FRICS, FCIQB, FAPM, FRSA, FHEA
Vice-Chancellor
Leeds Trinity University
